

Scenario Listing

Captain's Sea is played through the selection of a scenario. The scenarios depict a historic battle between two ships and provide some details on how they happened to come together at sea. Each scenario includes details on how the ships are initially placed on the map. To aid in this process, four squares are identified (A, B, C and D). The scenario indicates the square in which a ship starts and its initial direction (per the compass rose in the middle of the map). Additionally, the scenarios define the initial wind direction and the victory point multiplier applied to the hits scored by each ship.
